

We thank you for buying mobile phone X-treme PV68. This manual includes description of main mobile phone functions.

The phone X-treme PV68 allows to use 2 SIM cards of GSM standard at Dual Standby mode, i.e., in standby mode there are 2 cards in the connection; during the call 1 card works in active mode, 1 other card are unavailable.

The content of this manual is right. The description of some functions may differ due to changes in software or provider services. The company keeps the right to arrange changes in technical specifications without previous warning.

Important safety notes

This phone is designed for making and receiving calls, sending SMS messages, accessing the Internet (if provided), etc.

The following maintenance instructions are intended to help you use your phone correctly, without endangering the safety of people and property, and to keep the device in working order. Please read this section carefully and follow the instructions in it carefully.

The phone does not contain substances harmful to health (according to DSTU EN50581).

- Do not use the phone in the storm outdoors; do not expose the battery to high temperatures, hazardous and flammable liquids.
- Turn off the phone in case the phone usage may cause interference or dangerous.

- Do not put the battery, mobile phone and charger in a microwave oven or high pressure equipment, or may cause circuit damage and fire and other accidents.
- Do not try to open the body of the phone. If the phone or any of the accessories are not working properly, contact your nearest authorized service center.
- Use only accessories and chargers, that is designed for this model. Do not use defected USB-cables or chargers.
- Please do not short circuit battery equipment.
- Interference might be caused by poor shielding performance of medical devices such as hearing aids and heart pacemakers in the use of radio frequency devices including mobile phones. Consult medical device manufacturer or your doctor before using mobile phone. Please turn off the phone in which place posted notice required to. These places include hospitals and rest homes and other medical establishments. Because these facilities may be using equipment sensitive to external RF signal.
- Do not use mobile phones while driving. Follow the rules for using mobile phones while driving.
- Keep your phone and all its parts and accessories out from children and pets. They may accidentally damage these things or choke small details.

- Please do not put the mobile phone under direct sunlight.
- To avoid of getting heavy metals, acids, lye in water or soil, causing significant damage to the environment, utilize used battery according to the law. The legal liability arises in case of infraction about the utilization norms.
- For information about safe utilization of lithium-ion batteries can be obtained at your nearest qualified service center.

ATTENTION!

This phone is protected from moisture and dust according to the IP68 standard.

This means water resistance and protection against dust ingress.

The standard does not provide for shockproof. The phone, due to additional seals and strong fasteners, has increased vibration resistance, but requires caution in use.

Be careful with phone plugs, as well as follow general safety precautions.

If the penetration of moisture into your phone is caused not by factory defects, but by mechanical damage or loosely closed plugs, the warranty repair of the device will not be carried out.

Make a call

To call - dial number on digital keyboard in local or international format, or choose number from phone contacts list, and press Call1

button or Call2 button . To cancel call – press Cancel button. You can also make a call from the Contacts menu by selecting the contact you want

During call it is also possible to: switch volume in a speakerphone mode, start conversation record, add more persons to conference conversation, turn off\switch on microphone and etc.

Speed Dial

Go to the Main Menu—Contacts—Options—Advanced—Speed Dial.

In this menu, you can save up to 8 phone numbers for speed dialing, corresponding to the numbers 2-9 on the phone keypad. Phone numbers are selected from the phone book or entered manually. Pressing and holding keys 2-9 in standby mode will invoke the given number.

Attention. Setting the function is available only when the SIM card is installed

Connecting to a PC

To copy files to/from the phone (provided that a memory card is installed), you need to connect to a personal computer. This connection requires a USB-A< >USB-C cable. Connect the cable to your phone and PC, on the phone screen, select the USB drive option. On a PC, use standard removable media tools

Receiving a call

When a call comes in, press the "Call" button to receive an incoming call. Press the "Hang up" button to reject an incoming call.

Sound mode

Ringtones, volume, and other parameters are configured in the User Profiles settings (Menu—Profiles). There are 5 programmed profiles available: Normal, Silent, Meeting, Indoor, Outdoor, Earphone. To enable the profile, press the center key, to edit: Options—Settings.

Use Phone Menu

To access the device's menu, press the left soft key or the center navigation key.

The menu has the following sections:

Contacts: phone book of telephone contacts and SIM-cards;

Multimedia: This menu contains the media functions of the device: video camera, gallery, audio player, video player, FM radio, voice recorder.

Call logs: register incoming, outgoing and missed calls;

Settings: call settings, display settings, phone settings, security settings, connections

Messaging: for sending SMS messages and reading incoming messages;

Profiles: Configure audio profiles

Games

Camera. Separate menu for launch camera

Tools: Alarm clock, Calendar, Stopwatch, Torch light, Calculator, Files manager, Ebook, Bluetooth, SIM menu

Contacts

The Contacts menu is your phone book, which contains contacts stored in the phone and on SIM cards. The phone memory is designed to store 500 contacts.

Contacts are in alphabetical order. The search bar allows you to find contacts. To switch the method / language of the search press the # key

Adding a new contact: Choose "New" in the options, choose a place to save the contact, enter a name and phone number, press Options—Save.

For one contact, you can add the following information: Name (line length - 40 characters), Two Phone numbers, Group, Icon, Ringtone

To view the contact, select the cursor and press the center navigation key.

For a call, press the call button.

Additional options open with the left soft key.

New message: Create and send a text message to the contact.

Edit: edit the contact

Delete: delete the selected contact.

Copy: Copy contact between phone and SIM card.

It also has the ability to: View memory status and delete all contacts, make backups - export - or restore contacts - import - (only if there is a memory card)

When backing up contacts in the root of the memory card, a system file named vcard.vcf is created. When restoring contacts, information is taken from the same file.

Multimedia

Caution: It is desirable to use the following functions in the menu "Multimedia" under the condition of the installed memory card.

This section contains programs for working with photos, video and sound.

Video camera – for video recording.

Audio player – to listen to music files

To play/pause, press the center key. To go to the next/previous file – Right/Left. Use the Up/Down keys to adjust the volume. To create a playlist, copy the music files to a memory card. To change the settings, go to Options—Settings. To edit playlists, go to Options—Playlist.

Video player – for watching video recordings.

Images – to view images.

FM radio – for listening to FM radio stations.

Note! *In this model, FM radio operates with a built-in antenna. To improve the reception quality, you may need to connect a wired headset as an antenna. The sound of the FM radio and audio player is transferred to the external speaker and wired headset.*

To turn on/off, press the center key. To search for radio stations, press Right/Left. Use the Up/Down keys to adjust the volume. The Options menu has the ability to automatically and manually search channels, view saved stations, record files in a file and enable / disable background playback.

Sound recorder - for recording sound.

My files. The file manager allows you to work with files in the phone's memory and on the memory card. Operations such as copying, moving, deleting, creating folders are available.

Bluetooth - setup, device review, device connection

Torch on/off

Troubleshooting

Following recommendations may help to solve some problems with phone independently. In case problems occurs try to solve it yourself with following recommendations. If problem is not solved, contact to Sigma mobile service center.

Check whether battery is charged and whether problem continues after device reset.

Try to restore factory settings through menu «Settings - Phone settings – Restore factory settings» (password by default – 1122)

Problems with memory card mostly occurs in case of memory card breakage. Thus, firstly check given card separately. Also recommended to: take off and insert memory card in port, check whether card is put in port correctly, reload phone.

Phone does not power on: check battery charge, repeatedly connect charging device, and wait at least 10 minutes. Press and hold the button «Power» not less than 5 second. If device does not power on contact in service center.

Battery discharges rapidly: reasons for increased battery charges may be: low air temperature, active using of media programs, huge distance to cellular tower of connection operator.

Battery does not charge: check charging adapter connection to plug. Use only complete charging adapter and cable.

Impossible to call: this problem may be caused by low connection signal, network overloading, incorrect input of contact number, activated function of calling prohibition. Try

to change location, check level of connection signal, wipe phone to factory reset. Contact in service center.

Low receiver volume: during conversation, press button «Up» to increase volume. Set volume during conversation in profiles. Check signal of cellular connection.

Passwords

When loading the phone and during use, you may be prompted to enter the following passwords:

Phone password - 1122: The prompt occurs during download (if it is set in Menu—Settings—Security—Phone locked). This is the password of the general lock.

Privacy Code: Asked if privacy protection is enabled in the security settings when activating blocked features.

Factory reset password - 1122

PIN: If PIN verification is enabled, you must enter the code provided with the corresponding SIM card.

PUK code, PIN2 code are also provided with a SIM card.

Be careful installing blocking passwords: if they are lost, to renew phone functionality is possible only in service center.
